

Name: _____

Instagram Project

Task: Create an Instagram profile for a famous chemist. To create a believable profile, think deeply about the person you choose and do some research. What would this person post? How many friends would they have? What would their captions say?

What you need:

- An appropriate username
- A profile picture
- Number of posts, followers, following
- A bio
- 3 photos paired with 3 captions

Rubric:

The profile is completed <u>neatly</u> and <u>colored</u> .	/5
The number of followers, posts, and people the scientist follows represents the person's "real life"	/1
The bio (3marks), profile picture (1 mark) and username (1 mark) is an accurate representation of the chemist.	/5
The <u>pictures</u> and <u>captions</u> show an understanding of the chemist and their work (3 marks per photo/caption).	/9
